

VANSH NARULA

Full Stack Developer (MERN)

Ambala City | narulavansh430@gmail.com | 7082086751 | [linkedin.com/in/vansh-narula](https://www.linkedin.com/in/vansh-narula)

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on production experience building and deploying MERN stack applications, including payment gateway integrations, role-based access systems, real-time notifications, and cloud-hosted microservices. Comfortable across the stack — from designing REST APIs and MongoDB schemas to deploying and managing infrastructure on AWS EC2/S3. Currently working as a Full Stack Developer at Bexo.ai.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, Node.js, Express.js, React.js, MongoDB (MERN Stack)

Cloud & DevOps: AWS EC2, AWS S3, Docker, Firebase

Backend & Integrations: REST APIs, Redis (queues), Razorpay (payments & webhooks), Twilio (SMS/reminders)

Other: Role-Based Access Control (RBAC), Git/GitHub, SQL, Data Structures & Algorithms

WORK EXPERIENCE

Full Stack Developer | Bexo.ai, Mohali

Aug 2026 – Present

- Transitioned from intern to full-time Full Stack Developer role after a 3-month internship, contributing to production MERN stack applications.
- Work across the stack on feature development, API design, and deployment for client and internal projects.

Full Stack Developer Intern | Bexo.ai, Mohali

May 4, 2026 – Aug 7, 2026

- Built and shipped features using the MERN stack under production timelines, gaining hands-on experience with real client codebases.
- Collaborated with the team on API integrations, bug fixes, and deployment workflows, leading to a full-time offer.

MERN Stack Training | Solitaire Infosys, Mohali

Jan 2026 – Jun 2026

- Completed structured training in the MERN stack (MongoDB, Express.js, React.js, Node.js), covering full application development lifecycle.
- Left the training early (in month 5) after securing a stipend-based internship offer at Bexo.ai; certificate of completion held.

PROJECTS

LMS – Australian Academy — ptecore.australianacademy.in / pteacademic.australianacademy.in

- Built a full-featured Learning Management System on the MERN stack with three-tier role-based access: Super Admin, Institute (Block) Admin, and Student.
- Implemented Super Admin workflows to upload mock and practice test question banks, onboard institutes, and assign tests directly to institutes or students.
- Enabled Institute Admins to add their own students and assign practice/mock tests, creating a scalable multi-tenant test-assignment hierarchy.
- Integrated Razorpay for payments including webhook handling for real-time payment status updates.
- Deployed the application on AWS EC2 with AWS S3 used for media/file storage.
- Self-hosted an open-source grammar-checking service via Docker on the same EC2 instance and integrated it into the platform for automated grammar evaluation.

Launch Your Life — app.masterthelaunch.com

- Developed a coaching and accountability platform on the MERN stack with two core roles: Coach and User.
- Built daily/weekly activity tracking for users, with a coach dashboard to monitor progress across all assigned users.
- Integrated Twilio so coaches can send automated reminders, and added group management to organize users and broadcast messages (e.g., meeting links) to entire groups.
- Used Redis on the backend to manage job queues for reminders and messaging, improving reliability and scalability.

EDUCATION

B.Tech in Artificial Intelligence and Data Science

Chandigarh Engineering College, CGC Landran | 2022 – 2026 | CGPA: 8.37

CERTIFICATIONS

- SQL for Data Science — University of California, Davis (Coursera)
- Data Structures & Algorithms — CodeHelp by Love Babbar
